

Play-Doh rules!

1. Have plenty of shapes. There are ones that are plastic or wooden cut out shapes and others that you could push to make impressions. Each requires a different motor skills.
2. Include small and large rollers and plastic scissors. Great tools for building gross motor and getting the "yayas" for wiggly ones.
3. Place the play tub where your child can have a clear visual and easy access. Remember their eye line is different than ours. Get on your knees to see their perspective!
4. Enjoy the creativity. Make your own shapes to create a storyline; for example, mold a bird and a bird's nest with little eggs, turn a snake into a snail and have him crawl to the Play-Doh snowman, play restaurant and order food and have the chef make Play-Doh pizza and serve you!
5. You are never too old for Play-Doh!
